*CERTAIN ASPECTS OF BILINGUALISM*

*IN HUNGARIAN-BULGARIAN BILINGUAL CHILDREN*

*The paper presents results of two experiments realized among Hungarian-Bulgarian bilingual children in Budapest (Hungary). Were investigated some of basic language skills - speech production, mental lexicon, speech and reading comprehension, and the reading fluency in Hungarian and Bulgarian. The aim of the research is more accurate understanding of complex language processes in bilingual children, and summarizing some of the knowledge gained about bilingualism of the Bulgarian minority living in Hungary.*
