FISH PRIMER – THE MESSAGE

The Fish primer is not only the first fully secular printed book but also the first modern Bulgarian textbook. It has so far been the subject of various studies from a number of perspectives. Through its issue, dedicated to the 190th anniversary of the primer, “Language and literature” wants not only to evaluate the historical significance of this “best seller” of the Bulgarian revival in the years and decades after its creation, but also to see to what extent its messages need a “reading” today.

Keywords: Fish primer, Petar Beron, education, school, Bulgarian language
